WARNINGS Read Before Using Your Sega Dreamcast™ Video Game System

CAUTION
Anyone who uses the Sega Dreamcast should read the operating manual for the software and console before operating them. A responsible adult should read these manuals together with any minors who will use the Sega Dreamcast before the minor uses it.

HEALTH AND EPILEPSY WARNING
Some small number of people are susceptible to epileptic seizures or loss of consciousness when exposed to certain flashing lights or light patterns that they encounter in everyday life, such as those in certain television images or video games. These seizures or loss of consciousness may occur even if the person has never had an epileptic seizure. If you or anyone in your family has ever had symptoms related to epilepsy when exposed to flashing lights, consult your doctor prior to using Sega Dreamcast.

In all cases, parents should monitor the use of video games by their children. If any player experiences dizziness, blurred vision, eye or muscle twitching, loss of consciousness, disorientation, any involuntary movement or convulsion, IMMEDIATELY DISCONTINUE USE AND CONSULT YOUR DOCTOR BEFORE RESUMING PLAY.

- Sit a minimum of 6.5 feet away from the television screen. This should be as far as the length of the controller cable.
- Do not play if you are tired or have not had much sleep.
- Make sure that the room in which you are playing has all the lights on and is well lit.
- Stop playing video games for at least ten to twenty minutes per hour. This will rest your eyes, neck, arms and fingers so that you can continue comfortably playing the game in the future.

OPERATING PRECAUTIONS
To prevent personal injury, property damage or malfunction:
- Before removing disc, be sure it has stopped spinning.
- The Sega Dreamcast GD-ROM disc is intended for use exclusively on the Sega Dreamcast video game system. Do not use this disc in anything other than a Sega Dreamcast console, especially not in a CD player.
- Do not allow fingerprints or dirt on either side of the disc.
- Avoid bending the disc. Do not touch, smudge or scratch its surface.
- Do not modify or enlarge the center hole of the disc or use a disc that is cracked, modified or repaired with adhesive tape.
- Do not write on or apply anything to either side of the disc.
- Store the disc in its original case and do not expose it to high temperature and humidity.
- Do not leave the disc in direct sunlight or near a radiator or other source of heat.
- Use lens cleaner and a soft dry cloth to clean disc, wiping gently from the center to the edge. Never use chemicals such as benzene and paint thinner to clean disc.

PROJECTION TELEVISION WARNING
Still pictures or images may cause permanent picture tube damage or mark the phosphor of the CRT. Avoid repeated or extended use of video games on large-screen projection televisions.

SEGA DREAMCAST VIDEO GAME USE
This GD-ROM can only be used with the Sega Dreamcast video game system. Do not attempt to play this GD-ROM on any other CD player, doing so may damage the headphones and/or speakers. This game is licensed for home play on the Sega Dreamcast video game system only. Unauthorized copying, reproduction, rental, public performance of this game is a violation of applicable laws. The characters and events portrayed in this game are purely fictional. Any similarity to other persons, living or dead, is purely coincidental.
Starting Up
Set up your Sega Dreamcast™ game console according to the instructions provided in the Sega Dreamcast console manual. Make sure the power is OFF before inserting or removing a disc.

The Grinch is a 1-2 player game. Before turning the Sega Dreamcast power ON, connect the controller or other peripheral equipment into the control ports of the Sega Dreamcast.

To return to the title screen at any point during game play, simultaneously press and hold the A, B, X, and Start Buttons. This will cause the Sega Dreamcast to soft-reset the software.

VMU
To save game settings and progress, insert a VMU into Sega Dreamcast controller slot before starting play. You can load the saved games from the same VMU containing previously saved The Grinch™ games.

To read more about how to save and load games, see page 20, "Saving and Loading Games."

While saving a game file, never turn OFF the Sega Dreamcast power, remove the memory card or disconnect the controller.

Purchase additional controllers (sold separately) to play with two or more people.

Never touch the Analog Thumb Pad or Triggers L/R while turning the Sega Dreamcast power ON. Doing so may disrupt the controller initialization procedure and result in malfunction.

If the Analog Thumb Pad or Triggers L/R are accidentally moved while turning the Sega Dreamcast power ON, immediately turn the power OFF and then ON again making sure not to touch the controller.
Menu Controls
Start Button: Start/Pause/Resume the game.
Analog Thumb Pad UP/DOWN: Highlight a selection.
Analog Thumb Pad LEFT/RIGHT: Turns Notebook pages/change values (volume, vibration, etc.).
© Button: Confirm selection.
© Button: Cancel selection/return to previous menu.

Controlling the Grinch
Analog Thumb Pad: Move the Grinch.
© Button: Jump.
© Button (again while in air): Pancake.
© Button: Use a gadget when the Gadget Pack is activated (Left D-Button).
© Button: Bad breath to simply neutralize many opponents or activate some mechanisms.
© Button: Tiptoe when held while moving or Read/List/Activate when prompted.
Left D-Button: Tap twice to toggle Gadget Pack ON/OFF. Hold it to display the Gadget Wheel Selector.
Left Trigger and Right Trigger: Rotate camera LEFT or RIGHT.
Left and Right Trigger Simultaneous: Brings up Free-Look/Grinch's Eye mode.
Start Button- Pause and displays the Grinch's Notebook.
Right D'Button: Call Max.

Controlling Max the Dog
On several occasions, the Grinch will need the help of his companion Max to retrieve inaccessible items. Max can get himself through tight passages and easily reach hidden locations. Max has a limited set of movements and can perform basic actions only.
Analog Thumb Pad: Move Max.
© Button: Bark.
Right D-Button: Return to the Grinch.

Gadget Controls (use a gadget)
Once you have selected a gadget, many buttons get new functions and special actions that work exclusively in Grinch's Eye mode (Both Trigger Buttons). To use a gadget, the Grinch's Gadget-Pack must be activated first using the Left D-Button (toggles it ON/OFF). Most gadgets require the gathering of Rotten Eggs in order to function. See page 16 for more details about gadgets.
Binoculars (Free-look mode active only)
Press the © Button to Zoom In.
Press the © Button to Zoom Out.
Rotten Egg Launcher/Nitro Egg Launcher (Grinch's Eye mode active)
Analog Thumb Pad: Aim.
⑤ Button: Shoot Rotten Eggs or Nitro Eggs.
① Button: Zoom In (ONLY when the Binocular gadget is available.)
⑦ Button: Zoom Out (ONLY when the Binocular gadget is available.)
Left D-Button: Hold it to call the Gadget Wheel Selector.
Right and Left Trigger Simultaneous: Return to Normal Camera mode.
Start Button: Pause the game/shows the Grinch's Notebook.

Slime Shooter (Grinch's Eye mode active)
Analog Thumb Pad: Aim.
⑤ Button: Hold it until it is fully charged, release it to Shoot.
① Button: Zoom In (ONLY when the Binocular gadget is available.)
⑦ Button: Zoom Out (ONLY when the Binocular gadget is available.)
Left D-Button: Press it to call the Gadget Wheel Selector.
Right and Left Trigger Simultaneous: Return to Normal Camera mode.

Rocket Spring
⑤ Button: Hold it until the desired charge is reached, release it to jump.

Octopus Climbing Device (OCD)
⑤ Button: Jump towards an appropriately surfaced wall and the Grinch will stick to it.
⑦ Button: Release the grip; the Grinch falls or hangs to ledge if he is close to it.

Analog Thumb Pad: Controls flight direction.
⑤ Button: Hold it to lift off: press or release it to control the height.
⑦ Button: Bad breath is still available during the flight!
Start Button: Pause the game and show the Grinch's Notebook.
The Marine Mobile
Analog Thumb Pad: Controls the Marine Mobile direction.
A Button: Move Forward.
B Button: Turbo Forward.
C Button: Jump (on surface.)
Right D Button: Dive (from the surface.)
D Button: Interact with objects/character.
Start Button: Pause the game/shows the Grinch's Notebook.

Controlling the Camera
The camera tracking system of "The Grinch" always tries to give you the best point of view possible, but occasionally it is helpful to manually control the camera in order to inspect a specific environment. That's what the Left Trigger and Right Trigger are for! In Camera Eye mode (Grinch is visible on screen), pressing the Left Trigger rotates camera clockwise, while pressing the Right Trigger rotates it counterclockwise. To quickly bring the camera behind the Grinch, just tap both Triggers simultaneously. This works with Max also. In the Grinch's Eye mode where the Grinch is not visible, the same principle applies. If the Grinch owns the Binoculars, a Zoom In/Out is available using the A Button and the B Button respectively. Of course, Max doesn't have this ability.

Stealing Christmas
On the top of Mt. Crumpit, his eye pressed to the telescope, the Grinch observes Whoville. He mumbles something that his dog Max hardly perceives: "I must stop this whole thing! Why for year after year I've put up with it now! I must stop this Christmas from coming!" The Grinch just despises Christmas and this year, he has decided to disturb the rejoicing. He enters into his spacious cave and quickly rummages through the place. Suddenly he stops, picks up a large book from nowhere and he opens it. Quickly, he writes down some ideas, closes it, and puts it away. Yeah! The Grinch will take his ULTIMATE revenge on Christmas and those awful Whos this year...

Now, before Christmas, the Grinch must perform a series of tasks to ruin the feast's preparations. He must roam Who land and go through the four environments of the game to complete all his missions. These are Whoville, Who Forest, the Dump and Who Lake. So get prepared to give the Whos their worst Christmas ever!

The Grinch
Yellow eyes and Green hair all over the body... Vile and smelling like old green baloney... Yes! That's him! That's the Grinch! And here is a little bit of his story...

One day, disgusted by Who superficiality, the Grinch left the city to take residence in a humid, creepy cave in the heart of Mt. Crumpit. From there, with his canine companion, he discreetly observes every move the Whos make...And sometimes, he even returns down there to Whoville, to break things or scare some Whos with his pestilential breath. People say his bad breath is so strong it can destroy trees or green plants! No doubt... You're a mean one, Mister Grinch!
Max the Dog
Max the Dog is the Grinch's constant companion and loyal friend (the only one...) Max can perform actions the Grinch can't; he acts as an extension of his master. Max is not a second character, but kind of a fun tool. Max can enter small areas, walk in tight corridors, break certain gifts (the red and green ones), walk on narrow platforms or simply bring back tiny items to his master.

The Grinch's Exhaust-O-Meter
"Exhausting", the Grinch says! "This is just killing me!" A touch or a sound drives him crazy! This is monitored by the Exhaust-O-Meter displayed in the bottom-left corner of the screen. Empty circles represent his good condition; yellow-greenish filled circles show his exhaustion! Be careful! When the meter gets completely filled, the Grinch blows a fuse and he must restart from the beginning of the environment, close to the Vacuum Tube. To prevent exhaustion, the Grinch must break things or complete a mission that makes him feel better. Also, during the game, the Grinch has the ability to increase his resistance to exhaustion by collecting Hearts-of-Stone hidden in various locations.

What the Grinch Must Do To Steal Christmas...
To Steal Christmas, the Grinch has to perform a certain number of tasks in the four (4) different environments. Of course, it's not necessary to complete all missions of one environment to open another environment. It will be possible to come back later and finish what was left behind.

But if you want to complete the whole game, here's what you should know:
- Find all the gadget blueprints first and assemble them using the Grinch Computer; Gadgets are essential to completing several of the missions.
- Complete all missions (primary and secondary) for each environment; missions are listed in the Grinch's Notebook.
- Break all gifts scattered throughout each of the (4) environments.

Who's Who...
Here is a brief description of other game characters...

The Whos
The inhabitants of Whoville are nice, enjoyable, pleasant, and kind. It is for all these reasons that the Grinch despises them! Some Whos, like kids, are not afraid of the Grinch and try to touch and hug him to give him tenderness. Certain ones, like policemen, guards and patrollers are more courageous and try to stop him. Others are immediately frightened and run to hide out when they see the Mean One.

August May-Who
August May-Who is the mayor of Whoville. He is pretentious and full of pride. He has governed Whoville for as long as anyone can remember. He's always followed by his devoted but mindless servant, Who Bris. Both despise the Grinch for his pranks. Just a few good reasons for the Grinch to make them his favorite targets!

Who Bris
Who Bris is the Mayor's right arm, his servile servant. He does all the dirty work the Mayor doesn't want to do. But secretly, in a deep corner of his tiny brain, he dreams of the day HE will become the mayor of the City! One day, he says, they will call me Mayor Who Bris, you'll see!
Starting a Game

After the game introduction movie, when you see the Title Screen, press the Start Button. To begin a new game, use the Directional Button to move the highlight to NEW GAME and press the © Button to confirm. To continue a saved game, move the highlight to LOAD GAME and press the © Button to confirm. Then, let the Grinch's adventure begin or continue!

The Whos World

Mt. Crumpit

Mt. Crumpit stands in the middle of Whoville; this is where the Mean One lives! As the adventure begins, the Grinch stands on top of Mt. Crumpit on a ledge outside of his cave. From there, the Grinch must enter a series of tutorial rooms in order to reach the main floor where four (4) Vacuum Tubes stand; this forms the central hub of the game. At the very beginning, only the Downtown Vacuum Tube is accessible. The three (3) other environments will open as the game progresses and the required missions are completed successfully. The Grinch's computer stands on the same floor. This is where blueprint parts must be assembled to build the different gadgets. To activate a tube or the computer, get close enough until a message pops on screen and follow the instructions.

Downtown Whoville

This is where most of the Whos live. There, the Grinch must be careful not to arouse their attention. He must be quick to dodge the Whos' hugs and attacks. In Whoville, game play missions are numerous: smashing snowmen; painting graffiti on the mayor's posters; shuffling the mail, launching rotten eggs in Whos' houses; modifying the mayor's statue in the City Hall, and changing the date on the Countdown-to-Christmas Tower. A lot of work!

Who Forest

An enchanted place filled with little houses, beautiful trees, a magnificent ski station with an old-fashioned style chalet and all those happy Whos practicing their skiing skills.

Who Dump

For the Grinch, Who Dump is a real paradise! He enjoys its smelly aromas and he finds lots of food, pieces of equipment for his gadgets, and above all, there are almost no Whos here. In the tranquility of Who Dump, in the garbage and the scrap pieces, he can plan tricks to play on the Whos.

Who Lake

It's the annual Jamb-Who-REE on Who Lake! Of course, the Scoutmaster of the event is none other than Mayor May-Who, assisted by Who Bris. There certainly are a couple of pranks to be played on May-Who, Who Bris and those little scouts. In fact, Who Lake inspires more missions to the Grinch. Hey kids! Beware of the Grinch...
**Missions**

For each environment, there are several missions the Grinch has to accomplish: all missions are listed in the Grinch's Notebook (Pause Screen.) Once a mission is completed, a movie shows its disastrous result and a Check Mark appears aside the mission name in the Notebook. A certain number of missions (variable according to location) must be completed before the Grinch can visit a new environment. In the appropriate moment, a movie tells about the newest accessible environment.

**Collectibles**

**Gifts**

Since they represent Christmas, the Grinch can't resist the temptation of destroying them all in order to ruin the festivities. An in-game Gift counter (on the top-right corner of the screen) shows how many gifts were found each time the Grinch breaks a new one. Consult the Grinch's Notebook for gift status information. Each destroyed gift will also provide access to bonus levels hidden behind "SUPA-DAWS" located in the Grinch's cave. The doors require a certain number of collected gifts in order to open them. Get close to see how many each door requires.

**Gadget Blueprints**

As you'll see in the introductory movie, the Grinch lost all of the blueprints for his gadgets. Even worse, they were also shredded into small pieces and all dispersed throughout Who land. The Grinch needs them to build the useful contraptions required to accomplish his despicable missions! Find them all and assemble them in the Grinch's computer located in the cave. Once a blueprint is completed, the gadget is immediately constructed and delivered to the Grinch.

---

Useful Items

Special objects need to be located and used in order to complete some missions. For example, in Downtown Whoville the Grinch must find a paint bucket to accomplish the "Paint the Mayor's Posters" mission. Other items like rotten eggs are also indispensable to make gadgets work. Here are three (3) types of items frequently found:

**Rotten Egg Plants**
Not surprisingly, this plant gets its name because its smell is similar to that of rotten eggs. Found throughout Who land, the Rotten Egg Plants grow very quickly. And the bigger the plant, the higher the number of eggs available for collection. The Grinch also needs them as "fuel" for his gadget pack since they fuel all gadgets. Collect as many as possible to ensure proper functioning of the gadgets.

**Nitro Eggs**
These are rare, chemically mutated rotten eggs. They are limited in quantity and they have a peculiar explosion upon impact. When the Grinch picks them up, a special counter appears on the top-left corner and displays the number collected. They automatically replace standard rotten eggs to be used with the Rotten Egg Launcher. They are lost when the Grinch exits the location where he picked them up.

**Power ups: Hearts-of-Stone!**
Hearts-of-Stone, which are hidden in various locations, give the Grinch the ability to increase his resistance to exhaustion.
Travelling Between Whos' Worlds
In order to travel across Who land, the Grinch must first enter one of the four Vacuum Tubes located in his cave at Mt. Crumpit (hub). As the game progresses, tubes open and reveal new places to visit. To use a tube, just stand close to it and activate it (press the G Button...)

Whooshhh! And you're off to new adventures!

The Grinch's Contraptions: More About Gadgets!
The Grinch is a good inventor. With the help of his precious Blueprints, he builds a bunch of astonishing gadgets...

Binoculars
This is an exceptional gadget that does not require rotten eggs in order to work. With the Binoculars, the Grinch can see things closer and aim with better precision. To use them, get in the Grinch's Eye mode (press the Right and Left Trigger Simultaneously), press the G Button to Zoom In or the © Button to Zoom Out.

Rotten Egg Launcher
The Rotten Egg Launcher gives the Grinch a longer range of action. He can shoot certain characters to scare them, activate switches, or simply break things like gifts. First, select the gadget with the Gadget Wheel Selector, then, in Grinch's Eye mode, use the © Button to shoot. Remember that Rotten Eggs are required!

Slime-Shooter
The Slime Shooter is mostly used to temporarily neutralize Whos. It can also cover objects or surfaces in certain occasions. To use it, select it with the Gadget Wheel Selector, press the © Button (Grinch's Eye mode only) and hold it until the bottom-left meter indicates FULL, then release to shoot.

Rocket-Spring
This device helps the Grinch to reach very high locations. Select it first with the Gadget Wheel Selector. Hold the © Button and watch the meter fill up (on the bottom-left corner). Release it when the required energy is reached. The longer you hold the © Button, the higher the Grinch jumps.

Octopus-Climbing-Device (OCD)
This contraption will be helpful to climb on special surfaces like ice or flat steel. Select the gadget first and jump toward the wall or, during the Grinch's fall, try to grab a wall with a suitable surface. When the Grinch hits the surface with the OCD activated, he literally sticks to it! Use the Analog Thumb Pad to move the Grinch, and the © Button to release the grip.

Grinch Copter
The ultimate Grinch gadget that makes the Mean One fly! Select it first with the Gadget Wheel Selector. Hold the © Button to increase the throttle and fly upwards. On the © Button release, the throttle decreases and the Grinch goes down. Move the Grinch with the Analog Thumb Pad. And don't forget to check the Rotten Egg counter! The Grinch Copter requires many rotten eggs to fuel it.

Grinch's Personal Marine Mobile
This Special Gadget doesn't fit in the Grinch's Gadget Pack. This vehicle is required to visit a submarine location. Once constructed, it will be dropped at the right place, ready to use! Just take the Grinch there, get close and follow the on-screen information. The Analog Thumb Pad controls the direction, the © Button moves it forward, the © Button moves it in turbo mode (very fast), the Right D-Button makes the Marine Mobile dive from the surface and finally, the © Button makes it jump on the surface and then plunge beneath the surface.
The Costumes
The costumes will help the Grinch to hide his mean identity and give him access to certain places. Once the Grinch possesses the costume he must find a place to change. Be careful because Gadgets and Bad Breath ability become unusable when wearing costumes.

- The Who Cloak: Use the telephone booth to put on or remove this costume.
- The Scout Costume: Use the cabins to put on or remove this costume.

The Grinch's Computer
During the game, the Grinch must return to his cave to assemble the blueprints he found and to build the gadgets. Here's how:

1. Return to the cave in Mt. Crumpit and approach the Computer. When the message prompts, follow instructions to activate it. On the computer screen, you can flip each gadget page using the Left and Right Trigger. To assemble a blueprint puzzle, move the highlighted box over one part using the Analog Thumb Pad: Press the © Button to confirm selection. The highlighted box will change color and you can now move it, rotate it or simply drop it. Once a puzzle is complete and you resume game play, you will take possession of your latest invention.

Interacting with Friendly Folks or Items
When you get close to some folks or items, a message appears on the bottom of the screen giving the player simple instructions to read or listen to.

Neutralizing Undesirable Whos or Activating Mechanisms
The Grinch has a number of gadgets (Bad Breath, Rotten Egg Launcher, and the Slime Shooter) at his disposal to stop, neutralize or clear folks. Sometimes a combination of more than one method must be used. Some mechanisms need to be activated or neutralized the same way. Experiment!

The Grinch's Personal Notebook
The Grinch keeps a log of his activities in his Personal Notebook, which you can access from the PAUSE menu. Press the Start Button to pause the game. There, move the highlight to the desired selection with the Analog Thumb Pad UP/DOWN. Confirm the selection with the © Button. To go back one page, press the © Button.

- RESUME: Return to actual game.
- SAVE: Save game (not the physical position of the Grinch: just things completed).
- MISSIONS: Show the game mission status.
- GADGETS: Show the Grinch's gadgets and their status. (available or not)
- TOTALS: Show global status of collectibles.
- OPTIONS: Set audio setups.
- QUIT GAME: Exit a game.

Opening a New Environment
When the required missions are complete in a given environment, a movie introduces you to a new one. A new Vacuum Tube becomes accessible from the Grinch's cave.

Completing the Game
To complete the whole game, all of the missions and sub-missions must be accomplished, all of the Blueprints must be located, all of the Gadgets assembled, and all of the Gifts stolen. Something awaits the courageous ones who succeed! Are you one of those?
**Saving and Loading Games**

This will save all completed mission objectives (missions, items found, etc.) with the exception of the physical position of the Grinch. When you restart the game, the Grinch starts from his cave at Mt. Crumpit.

**Saving...**

If you have a VMU inserted in your Sega Dreamcast controller, you can save a game.

1. Press the Start Button to pause the game.
2. Select SAVE and press the A Button. Your game is now saved!

**Loading...**

If you have saved a game on a VMU, you can load it and continue play.

1. Insert the VMU into the Sega Dreamcast controller and turn the power ON.
2. On the Title Screen, press the Start Button.
3. Press the Analog Thumb Pad UP/DOWN to highlight LOAD GAME and press the A Button.
4. Press the Analog Thumb Pad on the game you want to load and press the A Button. Now you can continue this game.
5. If the Sega Dreamcast unit is already ON and the game has already been loaded prior to the insertion of the VMU, insert the VMU, then depress the Start Button. Then follow steps #3 and #4.
